

# LARGEST RANGE OF INNOVATIVE CHEESE TUBES IN STEEL & ALUMINIUM

## STEEL CHEESE TUBES

## ALUMINIUM CHEESE TUBES

### ADVANTAGES

- Long life due to high strength.
- Specially straightened to achieve better performance.
- Very good hardness for resistance to denting.
- Close tolerance tube for good fitment on cheese winder.
- Coating as per application needs.
- Combination of high strength and low weight.
- Light weight of only about 100gms (35x1.5mm)
- Can save good amount of electricity and
- on maintenance due to light weight.

### AVAILABLE SIZES

ID X OD (mm)  
**32 x 34 | 35 x 37 | 37 x 39**

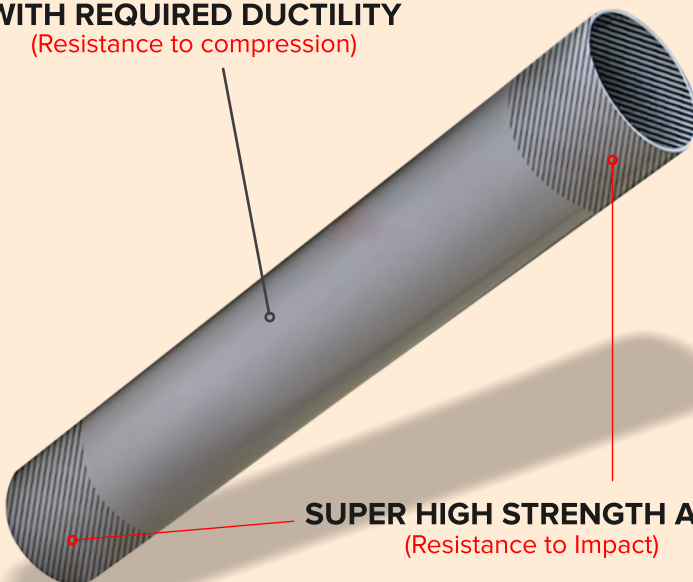

Length (mm)  
**218 | 220 | 230**  
or as per customer specifications

ID X OD (mm)  
**35 x 38 | 35 x 39.6 | 40 x 35**

Length (mm)  
**218 | 220 | 230**  
or as per customer specifications

## EDGE HARDENED STEEL CHEESE TUBES

**HIGH STRENGTH AREA  
WITH REQUIRED DUCTILITY**  
(Resistance to compression)

**SUPER HIGH STRENGTH AREA**  
(Resistance to Impact)

### ADVANTAGES

- Provides resistance to deformation/dents due to handling.
- Life of the cheese pipe is improved.
- Cost of lifting the dents and removing deformation is avoided.
- The 'Per Cycle Cost' of cheese pipe is drastically reduced.
